MEGAPOWER®

## Mega Power® Electrosurgical Generator

## The Power of Simplicity

The intuitive design and user-friendly set-up of the Mega Power Electrosurgical Generator allows your surgical team to hit the ground running. The confusion and frustration associated with previous generators are a thing of the past. Surgical teams have been asking for a generator that is simple, intuitive to use, and easy to set-up. The Mega Power is the answer with simple but elegant features that include:

- Large, easy to read displays. Highly visible, even at a distance.
- Recall feature readily recalls previous power settings and modes on set-up.
- Quick scroll feature allows for fast and accurate power setting adjustments.
- Power switch is easily accessible on front panel of generator.
- Highly visible return electrode warning light.
- 8 clearly labeled and easily selectable mode settings.

*Safety and  
Cost Savings in  
Electrosurgery*

# Electrosurgical Generator

## The Power of Performance

The Mega Power Electrosurgical Generator provides the power to perform consistently and flawlessly regardless of tissue type.

### Constant Control Technology™

The Constant Control Technology™ feature automatically monitors tissue impedance and adjusts power output to reduce tissue damage and drag. The result is a smooth, clean, accurate cutting effect at the lowest possible settings for maximum patient safety.

## Quality, Safety and Reliability

Megadyne's confidence in the Mega Power Electrosurgical Generator's exceptional performance and quality workmanship is backed by a full 2 year warranty. Participation in the Partner For Savings program can extend the Mega Power warranty for up to 8 years.

## Advanced Cutting Effect (ACE) Mode

Mega Power's proprietary Advanced Cutting Effect (ACE) mode is designed to provide a scalpel-like cutting effect for minimal thermal necrosis and reduced scarring.

**In addition to ACE cut mode, the Mega Power generator provides a variety of standard modes at the push of a button:**

### Pure Cut Mode

A consistent cutting effect at minimum power settings for improved patient safety.

### Blend Mode

Optimum blend of cutting and coagulation with superior hemostasis.

### COAG 1

Desiccation mode that provides hemostasis to tissue that is in contact with the active electrode. COAG 1 is designed to allow the active electrode to efficiently move through tissue for coagulation with dissection during surgery.

### COAG 2

The COAG 2 mode delivers a more gradual onset of energy and may be preferred by surgeons desiring a more mild delivery of coagulation with desiccation.

### Spray Mode

Superior fulguration of broad tissue areas.

### Micro Bipolar

The Micro Bipolar setting is designed to keep the initial voltage low to prevent sparking while delivering a consistent delivery of power to provide a tissue effect designed for all standard bipolar applications.

### Macro Bipolar

The Macro Bipolar power setting is designed for bipolar cases requiring a more rapid onset of power and higher voltage power output (such as tubal ligations).

### Built-in Current Monitor

Provides a visual indication of current flow.

## Megadyne's Commitment

- With over 25 years experience in the electrosurgery market, we're here to meet your long-term needs
- Your satisfaction is guaranteed with a full two year warranty. If a problem should arise, Megadyne will provide a loaner to keep your OR operating efficiently.
- The Mega Power electrosurgical generator accommodates equivalent accessories from other manufacturers which meet appropriate standards so your choice of accessories is never limited.
- The Mega Power Electrosurgical Generator completes Megadyne's full line of electrosurgical equipment, providing you with one source for all your electrosurgical needs.
- The Mega Power meets or exceeds all applicable safety and performance standards.

## Contact Us

Try the simple elegance of the Mega Power Electrosurgical Generator for yourself. Contact your local Megadyne Surgical Specialist, or call 1-800-747-6110 for more information. The Mega Power Electrosurgical Generator gives you the confidence you've come to expect from Megadyne, the Electrosurgical Authority.

# MEGADYNE®

The Electrosurgical Authority

# Reliability. Simplicity. Performance.

Choosing the right electrosurgical generator and supplies for your surgical environment does not need to be complicated. The Mega Power electrosurgical generator from Megadyne provides the performance and reliability necessary for your most demanding cases without being overly complicated. It's easy to set-up and delivers the clinical effects your surgeons expect without compromise.

## The Perfect Package

The Mega Power Electrosurgical Generator from Megadyne is the power behind Megadyne's exceptional offering of electrosurgical equipment and supplies. Let us configure a package to fulfill the complete electrosurgical needs of your OR.

- Mega Power
- Mega Soft® Reusable Patient Return Electrode
- Mega Vac Plus™ Smoke Evacuator System
- Disposable and reusable electrosurgical pencils
- E-Z Clean non-stick electrosurgery tips
- Mega Cart™

# Ordering Information

Description	Catalog Number
Mega Power Generator	
Mega Power Generator	1000
Accessories	
Mega Cart	1300
Mega Cart With Top Shelf	1300S
Monopolar Footswitch (3 meter cable)	1400
Bipolar Footswitch (3 meter cable)	1450
Monopolar Adapter	96007
Smoke Evacuator	
Mega VAC Plus	2100
Mega VAC Plus with Laparoscopic Mode	2200

Megadyne, the exclusive manufacturer of E-Z Clean® non-stick PTFE Coated Electrosurgery Tips, offers a full line of Electrosurgical Products including:

- Mega Soft™ Reusable Patient Return Electrodes
- Electrosurgical Pencils
- E-Z PEN™ Reusable Pencils
- PTFE Coated Laparoscopic Electrodes
- All-In-One® Hand Control
- All-In-One® Coated Laparoscopic Electrodes
- Lletz Loop Electrodes
- Reusable Indicator Shaft® Laparoscopic Electrodes
- MegaVAC™ Plus Smoke Evacuation System

To order any of our high-quality E-Z Clean Non-Stick PTFE Coated Electrosurgery Tips or our other fine Electrosurgical Products, contact Megadyne toll-free at **1-800-747-6110**.
