

MiniVacTM

Surgical Smoke Evacuation System

Compact design allows for easy placement on a shelf or cart and accommodates stackability - perfect for tight spaces

Combination ULPA and charcoal filter with 35 hour maximum filter life

3 adjustable flow settings

Optional EZLink Automatic Activation Device

3-port filter eliminates the need for extra adaptors

Covered filter ports for increased safety

The MiniVac is designed to be simple to use and versatile in its options for tubing and accessories. Providing effective surgical smoke evacuation that encompasses 4 layers of filtration and up to 35 hours* of filter life, the MiniVac delivers the performance necessary to effectively manage surgical smoke plume with unsurpassed value.

**Dependent on flow settings*

MiniVac™

Surgical Smoke Evacuation System

Megadyne: Your Total Smoke Solution

The MiniVac is perfectly suited for use with the ZIP Pen™ smoke evacuation pencil from Megadyne. The ZIP Pen allows surgeons to experience comfortable and precise electrosurgery while minimizing the hazards of inhaling surgical smoke. It functions like a standard electrosurgical pencil, but effortlessly removes surgical smoke at the source. Three ergonomic grip options provide a level of choice and comfort surgeons will appreciate.

Three ZIP Pen Grips:

“Trigger” Grip Method

Considered by many to be the most ergonomic grip, the ZIP Pen tubing becomes part of the hand and eliminates torque.

“Over the Hand” Grip Method

This grip reduces torque by draping the tubing over the surgeon’s thumb or back of the hand.

“Traditional” Grip Method

Tubing can be kept in the full upright position (as shown) to emulate a traditional pencil if so desired.

Description	Catalog Number	Qty Per Box
MiniVac Smoke Evacuation System		
MiniVac Smoke Evacuator 6" H x 11" W x 15.5" D (15.2 cm H x 27.9 cm W x 39.4 cm D)
